

# LUSCIOUS LASSIE FOR G3F & G8F FUTALICIOUS ~~Mini-tutorial~~

## 1 - What is Luscious Lassie?

Luscious Lassie for G3F & G8F is a graft including morphs, textures, cumshots and hair follower. The graft transforms Futralicious into a canine-looking male genitalia. It works for:

-G3F Futralicious v3;

-G8F Futralicious v3;

It isn't compatible with G3F and G8F versions of Roasty.

## 2 - How to install it? [two possibilities]

### A - Using DAZ Installation Manager

– Locate your DIM zip directory: Open DIM, click on the upper right gear, click on the 'Downloads' tab, and locate the Package Archive directory:

- Copy in it both the zip (do not unzip it) and the dsx files;
- Refresh DIM (couple of round arrows at the top), and enable the 'Ready to Install' tab. Locate the product, and click 'Install'... done!

Remember that in the DIM settings, you can choose the destination library.

### B – Manual procedure

Locate your main DAZ folder. It may be something like C:\Users\Public\Documents\My DAZ 3D Library.

People/Genesis 3 (or 8) Female/Anatomy/  
/Futalicious v3/5\_Luscious Lassie

You can access to the dialable morphs in the parameters tab, with FUTALICIOUS selected in the scene:

Merge the contents of the .zip file with your main DAZ folder, where your content is installed. For MAC users: follow instructions here:

<http://www.renderotica.com/community/forums.aspx?g=posts&t=204659&cmsg=0&cmn=>

--> It is important that the **data** and **Runtime** folders are properly installed in your content library folder with the exact path provided in the zip (installing in a sub-folder is a common mistake), otherwise textures won't be found.

### 3 - Where is my content?

Typing "LL\_" in the parameters tab, with "All" selected is a quick way to access to all the morphs:

You can access to the presets in your Content Library tab under:

## 4 – Quick setup

- ✓ Select G3F or G8F;
- ✓ From the '5\_Luscious Lassie v3' folder, load '1\_Luscious Lassie Full' wearable preset:

- ✓ [optional] Select Futalicious Shell from the Scene Tab, and load a Futalicious material preset on it. If you are loading a texture preset from 'Texture Wizard', use only the ones included in the '1\_Dicktator UV set' folder; Select again G3F or G8F;

- ✓ Load the '2\_FTL\_LL\_Material Copy v3' from the '5\_Luscious Lassie v3' folder:

## 6 – Manual setup

- ✓ Select G3F or G8F and load '1\_Futalicious Genitalia v3' and Futalicious Shell on it as usual. You **don't need** to load the '2\_Futalicious\_Material Copy v3' script.

- ✓ [optional] Select Futalicious Shell from the Scene Tab, and load a Futalicious material preset on it;

✓

- ✓ With Futalicious selected in the scene, load 'Luscious Lassie Genitalia' from the '5\_Luscious Lassie v3/6\_Manual Setup' folder;

- ✓ With G3F or G8F selected again, load the '2\_FTL\_LL\_Material Copy v3' from the '5\_Luscious Lassie v3' folder:

## 6 – Textures setup [IRAY only]

Select Futalicious Shell, and load a texture / displacement preset on it:

## 7 – Morphs setup

Select 'Futalicious Genitalia' in the scene and load a shaping preset on it.

You can also mix the presets in the parameters

tab (with Futalicious selected).

scene and loading a color preset on it from the materials presets sub-folder.

Hairs will conform with Futalicious genitalia. If you need to pose the shaft 1 bone, do it on Futalicious, not on Luscious Lassie... This way JCM will properly work.

## 7 – Cumshots

Select 'Luscious Lassie' genitalia in the scene and load a cumshot preset on it:

## 8 – Hairs

Select 'Futalicious' genitalia in the scene and load the hair follower on it. You can change its color selecting 'Luscious Lassie Hair' in the
