

INSTRUCTIONS

- AUTOLOADING - Select the Genesis 9 figure (with HD Penis applied) in the scene and then double-click on one of the AutoLoad & Fit scripts to load both hair props of that set. Hair props will be fitted automatically to the holder.

- MANUAL LOADING - Load the hair style of your choice and with the hair prop selected go to Parameters/General/Misc and under Fit To choose "Genesis 9" for Style G and "HD Penis for Genesis 9" for Style HDP. This will allow the hair to follow the figure.

FIT TO GENESIS 9

FIT TO HD PENIS

If the figure is not a default Genesis 9 (base male) or if it is not in the default pose, the hair might not be in the proper position when you load it, in that case, go to the Parameters/General/Transforms and toggle on/off the Apply Transformation option. Parenting is NOT needed and may cause undesired behaviour!

In order to load materials hair prop should be selected in the "scene" pane. The same material presets are usable on all hair props from this package. The hair color will be visible in renders although it is appearing black in the viewport.
