

INSTRUCTIONS

- "Growler XY G9" is a set of conforming strand-based pubic hair props for "XY G9" by db xxx.
This package has 15 styles with 20 color presets. The styles vary from natural full bushes to trimmed looks.
All these hair props allow you to create many different, naturally layered styles and you can load any number of props to get the desired look.
Hair props fit to XY G9 genitalia and therefore are not affected by any additional geografts.

HOW TO USE:

Load the hair style of your choice and with the hair prop selected go to Parameters/General/Misc and under Fit To choose "db xxx-XY G9". This will allow the hair to follow the figure.

If the figure is not a default Genesis 9 or if it is not in the default pose, the hair might not be in the proper position when you load it, in that case, go to the Parameters/General/Transforms and toggle on/off the Apply Transformation option. Parenting is NOT needed and may cause undesired behaviour!

In order to load materials hair prop should be selected in the "scene" pane.

Note: The hairs look more soft and smooth after adding a subD, if this is what you'd like, when you load the pubic hair prop select it in the scene pane/options menu/Edit/Geometry/Convert to SubD.
This will give you the Mesh Resolution option in your Parameters tab, and there you will find options to increase the smoothing if you like.
