# Installation

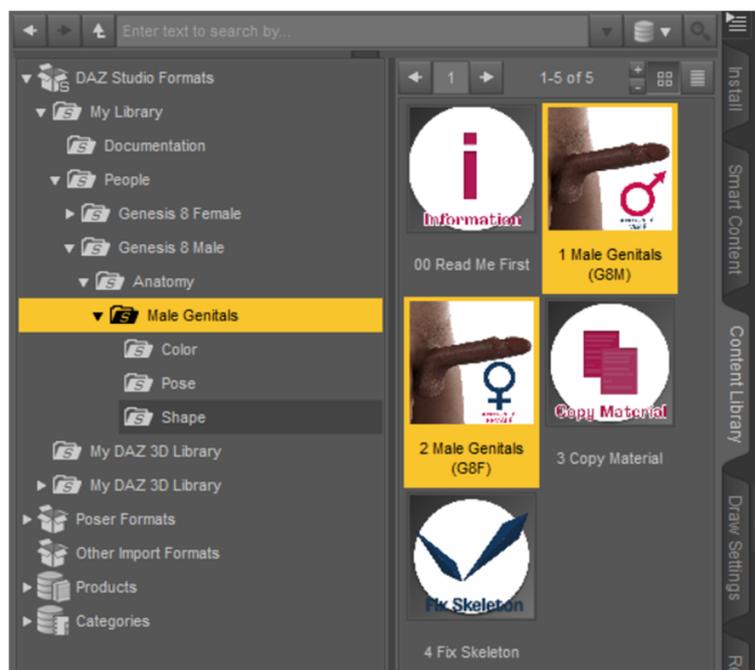

Copy the folders **data**, **People** and **Runtime** to your library in the Daz folder.

usually: *Documents -> DAZ 3D -> Studio -> My Library*

Afterwards you will find the content in Daz Studio.  
*Content Browser -> DAZ Studio Formats -> My Library -> People -> Genesis 8 Male -> Anatomy -> Male Genitals*  
and

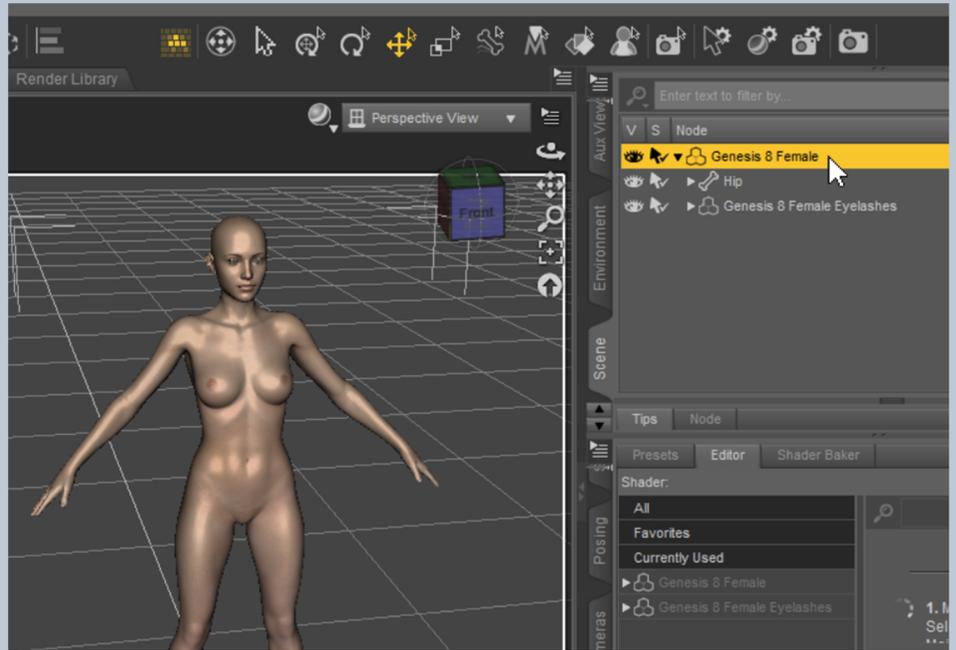

*Content Browser -> DAZ Studio Formats -> My Library -> People -> Genesis 8 Female -> Anatomy -> Male Genitals*

If you can't find it, try to right click **My Library** in the Content Browser and click refresh.

# Apply **Male**Genitals to your figure

Select your Genesis 8(.1) figure in the scene.

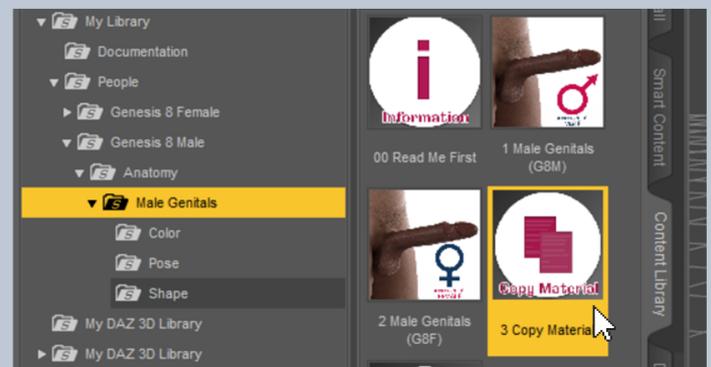

1

For G8(.1) Male double click  
**1 Male Genitals (G8M)**  
For G8(.1) Female double click  
**2 Male Genitals (G8F)**

2

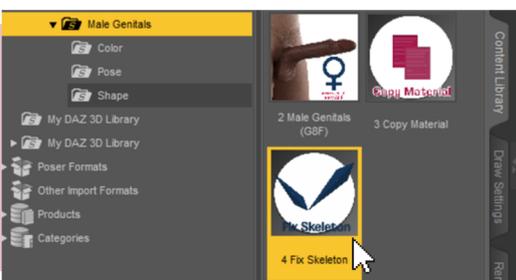

Double click  
**3 Copy Materials**

3

If you use a character with a different height double click  
**4 Fix Skeleton**

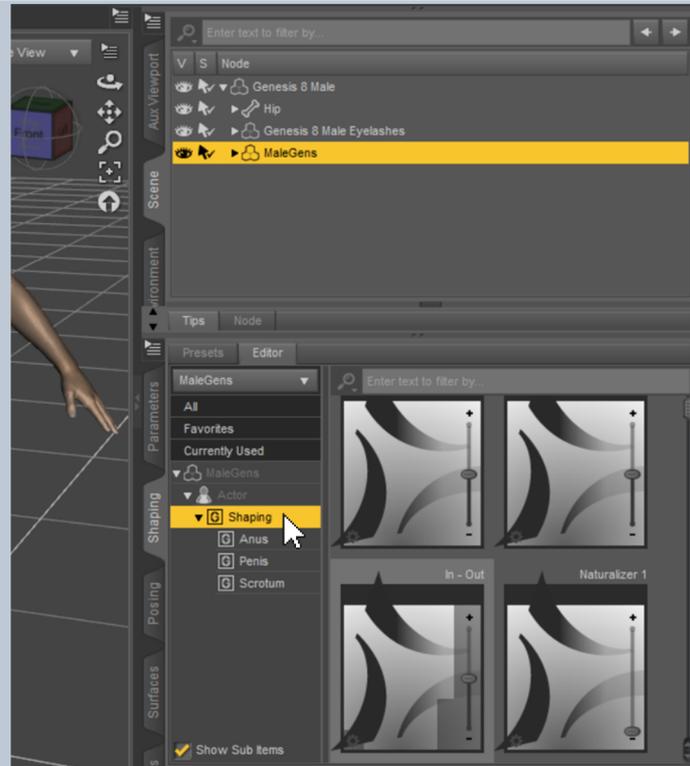

4

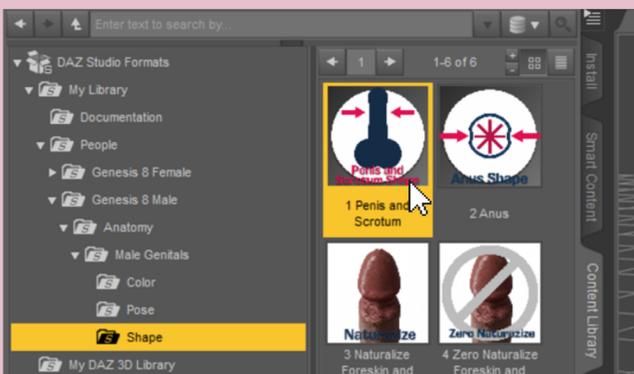

# Shaping

You find all the shapes morphs in **Shaping** tab [Actor -> Shaping].

# Shapes

# Shape UI

You can easily change the most important properties with the Shape UI in the Shape Folder. Double Click 1 Penis and Scrotum or 2 Anus to open the UI.

# Naturalize

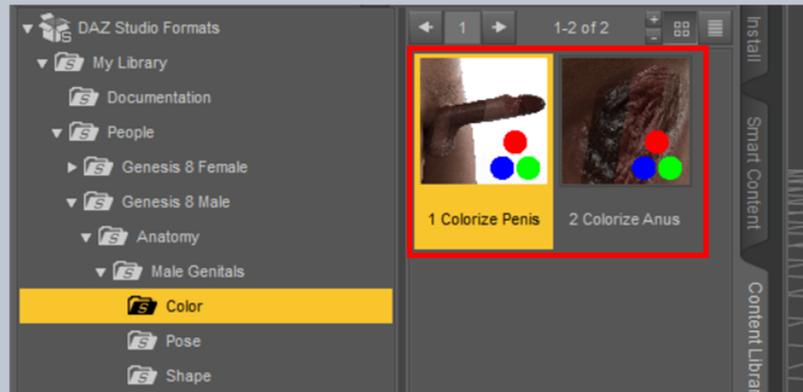

Double click 3 Naturalize Foreskin and Glans Neck or 5 Naturalize Anus and Rectum to apply a bunch of morphs which gives the graft an uneven shape and make it look more natural. You can undo it by clicking the crossed out icons.

# Color

In the Color folder you find **1 Colorize Penis** and **2 Colorize Anus**.

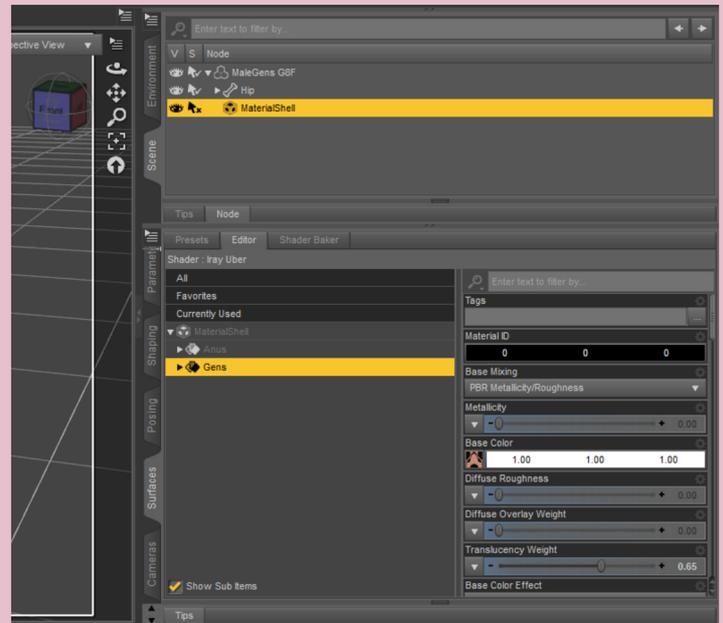

Double click one of them to customize the color of the craft. You can change the color by clicking on one of the the **color fields** to open the color picker and mix it in with **Overlay Strength**.

# Color

# Surfaces

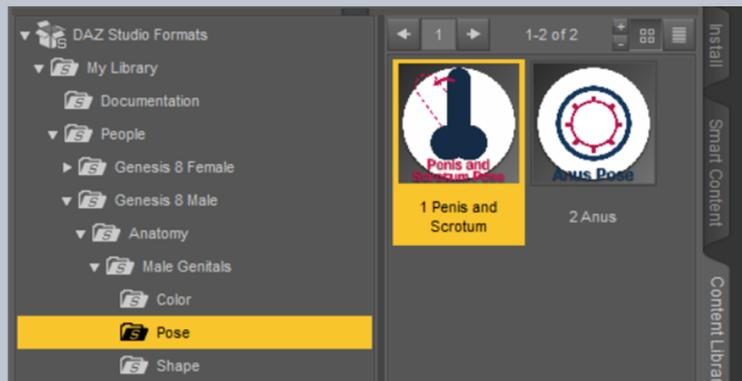

You find the materials in the **Surfaces** pane of the **Male Genitals Shell**.

# Posing

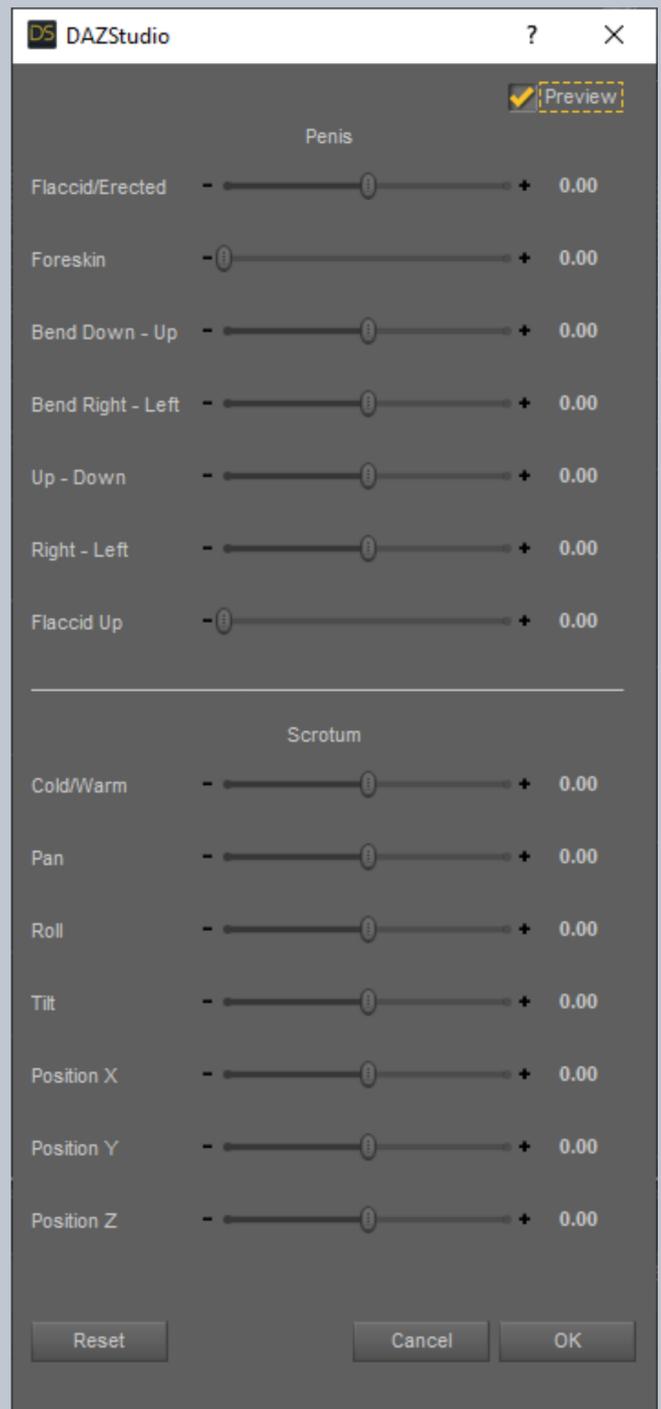

In the Pose folder you find **1 Penis and Scrotum** and **2 Anus**.

Double click one of them to open the UI.

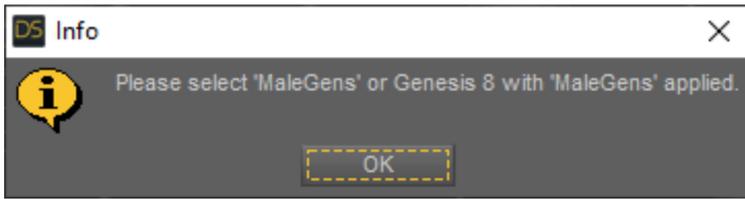

In this UIs you will find the most important properties.

For more customization you find all pose morphs in the **Posing** pane. (Posing)

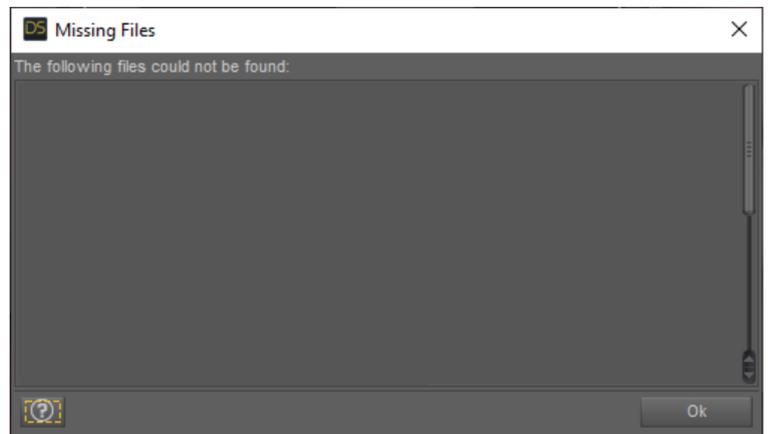

Posing

# Errors and Troubleshooting

Please make sure you have a Genesis 8[.1] Figure selected and Male Genitals are applied. [described on page 2]

Files are missing. Please download and install again.
