

# Dicklones for G8F/G3F Futalicious and G8M/G3M Dicktator

~~Mini-tutorial~~

## 1- What is Dicklones?

Dicklones is a set of clones that allow you to load any wearable (cumshots, etc) from one version of Futalicious/Dicktator to another.

## 2 - How to install it?

### A - Using DAZ Installation Manager

– Locate your DIM zip directory: Open DIM, click on the upper right gear, click on the 'Downloads' tab, and locate the Package Archive directory:

- Copy in it the zip and dsx files;
- Refresh DIM (couple of round arrows at the top), and enable the 'Ready to Install' tab. Locate the product, and click 'Install'... done!

### B – Manual procedure

Locate your main DAZ folder. It may be something like C:\Users\Public\Documents\My DAZ 3D Library.

Merge the contents of the .zip file with your main DAZ folder, where your G8M content is installed.

--> It is important that the **data** and **Runtime** folders are properly installed in your content library folder with the exact path provided in the zip (installing in a sub-folder is a common mistake), otherwise textures won't be found.

**For MAC users:** (instructions courtesy of Guttersnipe):

1. Locate your "My Library" folder and COPY the unarchived contents of your product by dragging and dropping while holding down the "alt" button.
2. A dialogue will appear.

DO NOT PRESS RETURN OR CLICK ON "REPLACE"

This is very, very important – if you do it will delete everything you have in any matching folders.

Instead click on "Apply to All" and then (carefully) click on "MERGE":

You may need to refresh your content library (alt-click on "My Library" and select "refresh" from the context menu) or restart Daz to see your new items.

### 3 – How to use Dickclones

– Load on your figure the Dicktator/Futalicious graft from the 'People/Dickclones' folder;

– Select Dicktator/Futalicious and load the unsupported wearable (for example a G8M Dicktator cumshot on G3M Dicktator);

- A window will pop up. Select the proper clone and accept.

[only G8F Futalicious you may rather load from the 'People/Genesis 8 Female/Anatomy/Futalicious' folder as usual... For G3F Futalicious an for G3M/G8M Dicktator, use the graft from the 'People/Dickclones' folder, or Dickclones won't properly work]

– Set up Dicktator/Futalicious as usual with the mat copy script and geoshell;

->>> Except for Futalicious G8F, **if you use the Dicklones grafts**, you will need to use the clones with Auto-Fit even if you load matching followers (G3M cumshot on G3M Dictator for example):
