

# FutalateX for G8M & G8M 8.1 ~~Tutorial~~

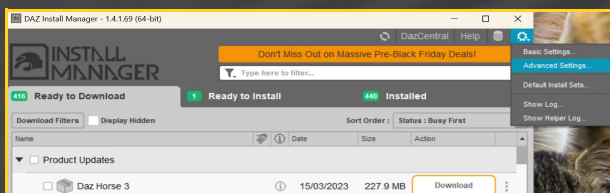

## 1- What is FutalateX for G8M?

FutalateX is a set of condoms for Genesis 8 and Genesis 8.1's Dicktator graft. The set comes complete with texture, shaping and cum options.

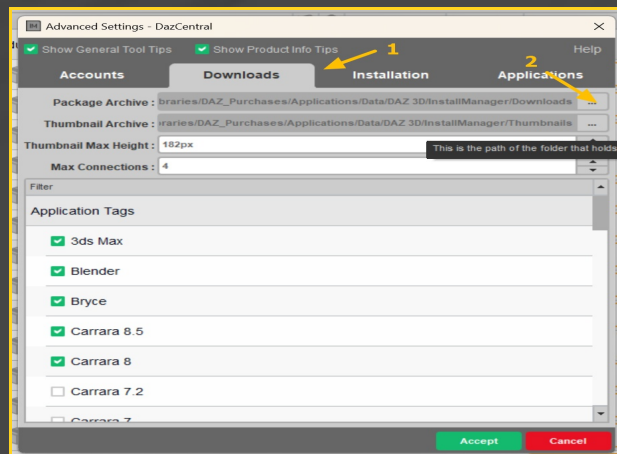

## 2 - How to install it?

### A - Using DAZ Installation Manager

1: Open DIM, select "Advanced settings";

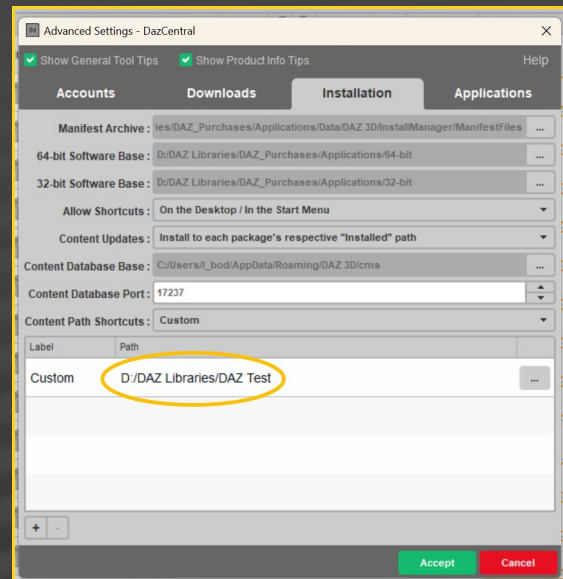

2: Check the Downloads tab (1), locate the download directory (2);

3: Browse to this very directory, drag and drop

the .zip and .dsx files you downloaded from Renderotica (if you use a MAC don't click Return or Replace);

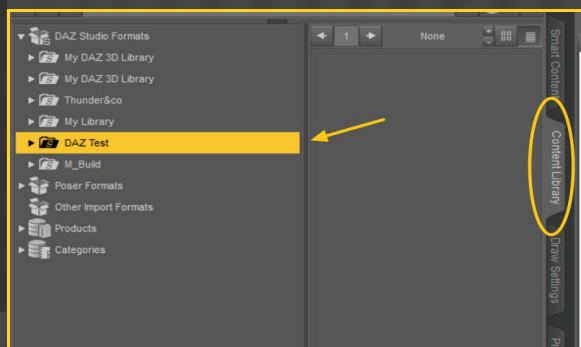

4: "Advanced settings" again, "Installation" tab, check or select your installation folder;

5: Go to the "Ready to Download" tab(1), update the list with the couple of arrows (2), click "Install" (3);

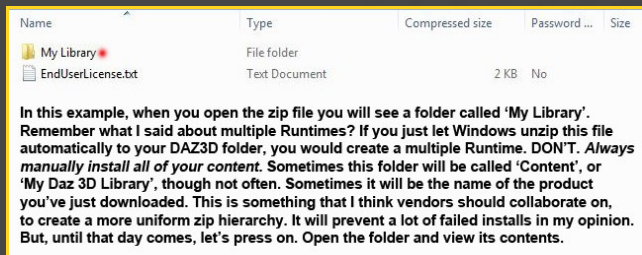

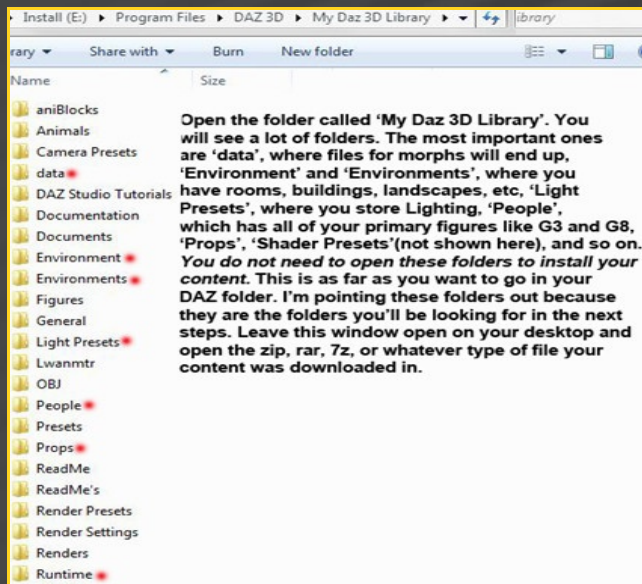

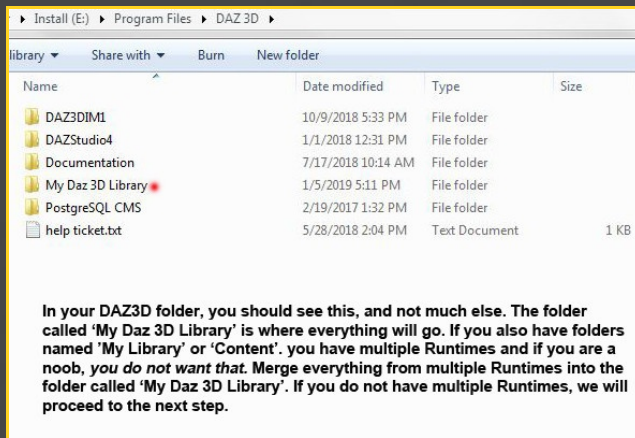

6: Open DS, locate the installation library in the "Content Library" tab.

## B – Manual procedure

For PC users: (instructions courtesy of matt):

For MAC users: (instructions courtesy of Guttersnipe):

1. Locate your "My Library" folder and COPY the unarchived contents of your product by dragging and dropping while holding down the "alt" button.

2. A dialogue will appear.

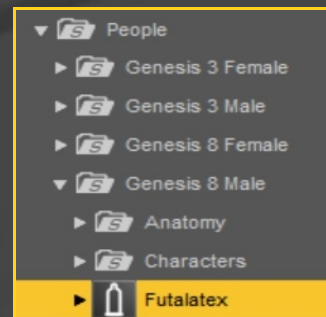

DO NOT PRESS RETURN OR CLICK ON "REPLACE"

This is very, very important – if you do it will delete everything you have in any matching folders.

Instead click on "Apply to All" and then (carefully) click on "MERGE":

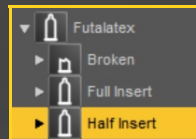

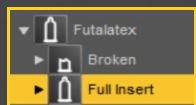

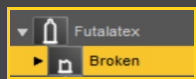

You may need to refresh your content library (alt-click on "My Library" and select "refresh" from the context menu) or restart Daz to see your new items.

### 3 - Where is my content?

You can access to the graft and presets in your Content Library tab under "People/Genesis 8 Male/FutalateX"

## 4 – Quick setup

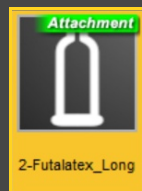

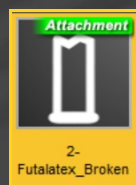

– Load **G8M** or **GM 8.1** and set up the **Dicktator** genitalia on it;

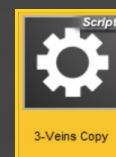

– Select the **Dicktator** genitalia;

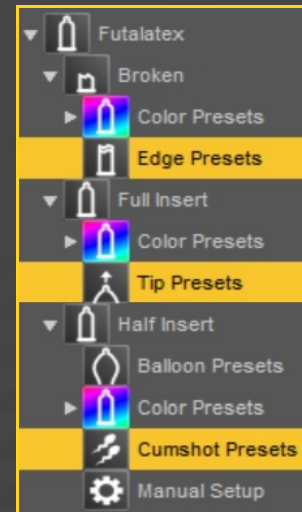

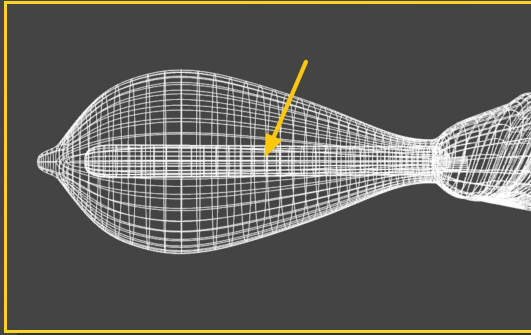

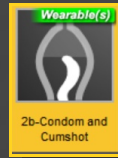

– Load one of the condom wearable presets:

If you have veins displacement loaded on Dictator's geoshell, load the **"Veins Copy"** script:

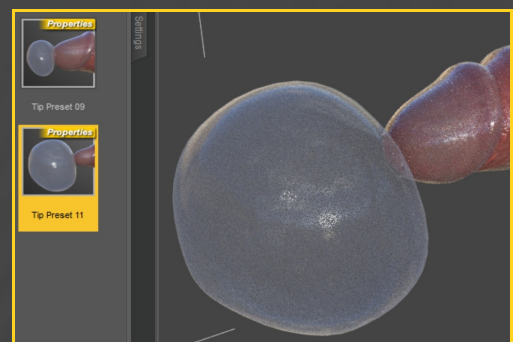

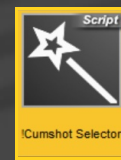

On the half-inserted condom, "Condom&Inner Cumshot" adds a follower to simulate ejaculation inside the condom:

Just select the condom/cumshot follower and inject one of the presets:

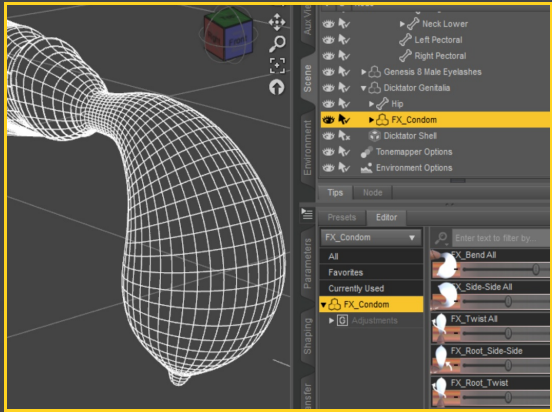

The internal cumshot can be shown or hidden selecting G8M or any of its followers and loading the "**Inner Cumshot\_Hide/Show**" presets:

## 5 – Shaping FutalateX

The FutalateX condom(s) can be quickly shaped with the presets included in the dedicated subfolders:

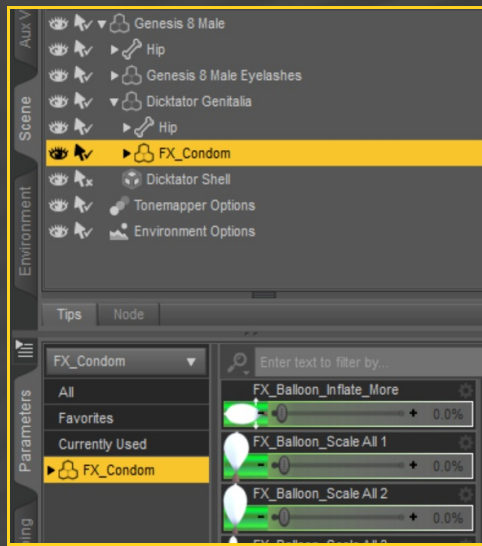

The condom tip/balloon includes bones that can be posed and scaled in the viewport or in the "**Posing**" tab:

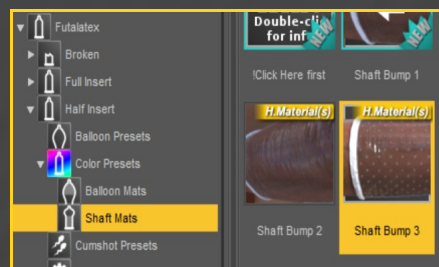

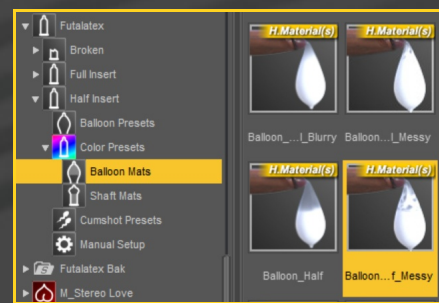

Select G8M or any of its child nodes and inject a hierarchical color preset. The presets will color the internal cumshot as well:

For fine-tuning, with the condom selected in the scene, you can dial its morphs in the **"Parameters"** tab:

- Then, inject a shaft or balloon preset. They'll keep the color previously injected:

## 6 – Texturing Futralatex

Texturing is layered in two steps.

–First, set the condom color (or keep the default one):
