---> It is important that the **data** and **Runtime** folders are properly installed in your content library folder with the exact path provided in the zip (installing in a sub-folder is a common mistake), otherwise textures won't be found.

3 - Where is my content?

You can access to the graft and presets in your Content Library tab under People/Genesis 3 Female/Anatomy/Golden Palace v2:

4 – Quick Setup

Load G3F in the scene, and with it selected, load '1_Golden Palace v2', '2_Golden Palace Shell v2', '3_Golden Palace Material Copy v2':

5 – Options

If you want to colorize the gen, select G3F or any of its nodes, and call the colorizing script:

Selector scripts have been included for any of the following options. Just select G3F or any of its nodes, the selector script, and the preset/follower.

- You can shape the glutes...

...or the genitalia.

You can set the anus dimeter...

...load a bonus squirt...

...or two fibermesh hairs, with three texture options:

Remember to check the many Golden Palace morphs in the Parameters Tab:

There are two other morphs in the parameters tab under People/Genesis 3 Female/Actor/Hip/Golden Palace. They can be tweaked manually or dialed using the presets included in the '3-Basic Shaping Presets G3F' folder:

Load the '**Shell Fix**' script on any shell in order to solve conflicts (gray surfaces) with the eyelashes or other grafts (Headlights, etc.):

6 - UV Options

Many G3F DAZ characters come with custom Uvs. Golden Palace supports default G3F and Victoria 7 UVs. More UV sets are available in the expansion pack:

The Material Copy script will set the correct UV set for you. If you want to set it manually, select '**Golden Palace Gens**' in the scene, and the UV set you need from the '1-UV Sets' folder.
