

Stereo Love for G9 Golden Palace, Dicktator and Double Danglers

~~Mini-tutorial~~

1 - What is Pussy Wizard for G9 Golden Palace, Dicktator and Double Danglers?

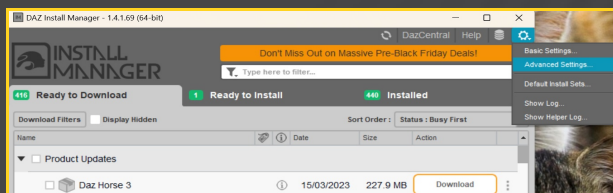

Stereo Love for G9 is a set of morphs, textures, cumshots and toys. It works for:

- G9 Dicktator;
- G9 Double Danglers;
- G9 Golden Palace.

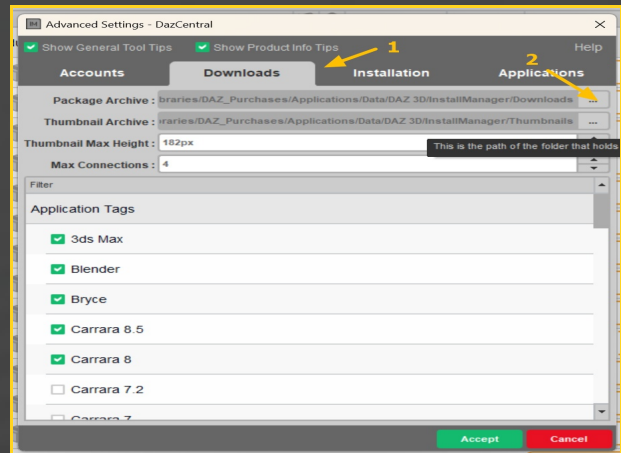

2 - How to install it? [two possibilities]

A - Using DAZ Installation Manager

1: Open DIM, select "Advanced settings";

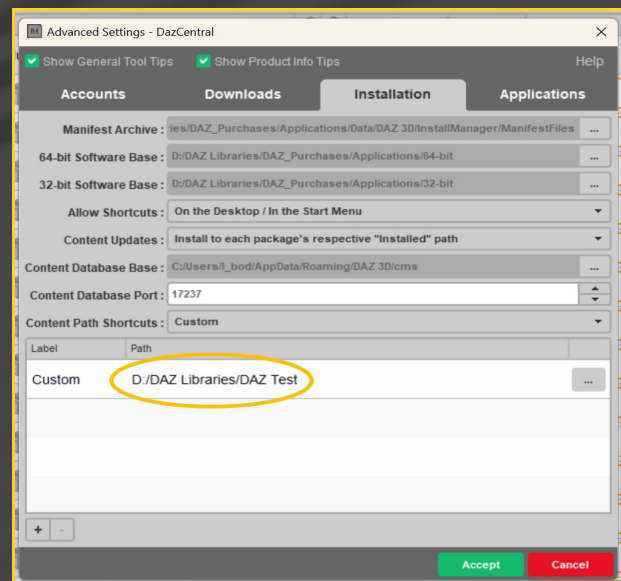

2: Check the Downloads tab (1), locate the download directory (2);

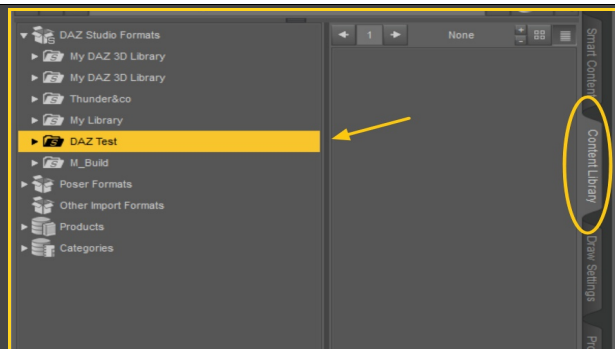

3: Browse to this very directory, drag and drop the .zip and .dsx files you downloaded from Renderotica (if you use a MAC don't click Return or Replace);

4: "Advanced settings" again, "Installation" tab, check or select your installation folder;

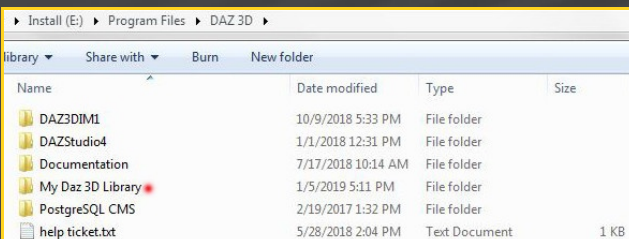

5: Go to the "Ready to Download" tab(1), update the list with the couple of arrows (2), click "Install" (3);

6: Open DS, locate the installation library in the "Content Library" tab.

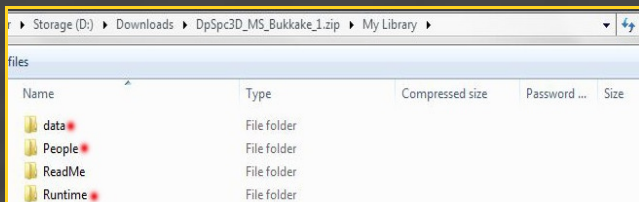

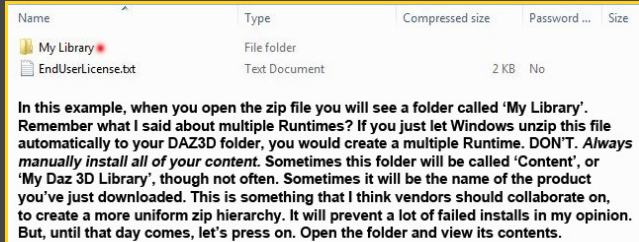

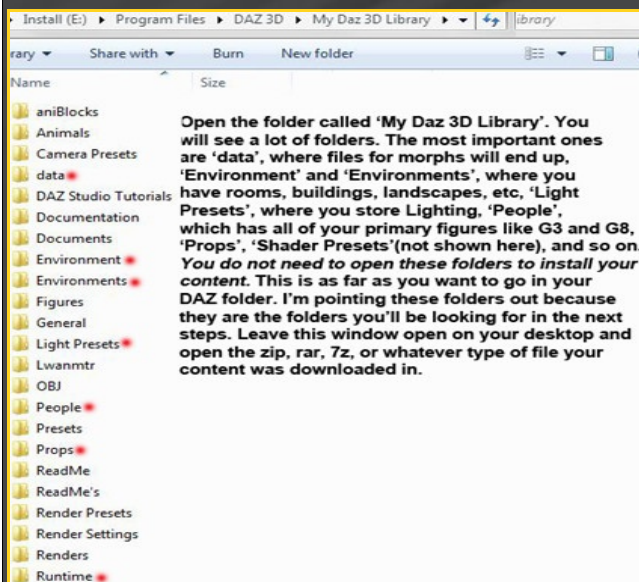

B – Manual procedure

For PC users: (instructions courtesy of matt):

In your DAZ3D folder, you should see this, and not much else. The folder called 'My Daz 3D Library' is where everything will go. If you also have folders named 'My Library' or 'Content', you have multiple Runtimes and if you are a noob, you do not want that. Merge everything from multiple Runtimes into the folder called 'My Daz 3D Library'. If you do not have multiple Runtimes, we will proceed to the next step.

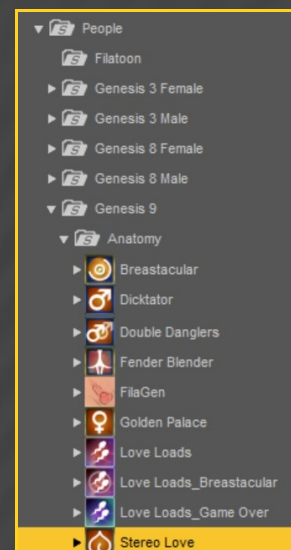

This is the honeypot. This is your content. In some cases, when you open the zip file this is what you see right away. Sometimes not. In any case, these are the folders you will be manually installing to your 'My Daz 3D Library' folder that we looked at earlier. You left that window open on your desktop, right? No? Dingus. Reopen it. Now, select all of the folders and drag them either all at once or one at a time to their new home, which is called 'My Daz 3D Library'. You will have prompts asking if you want to merge folders. Say Yes. If it is an update, you may have prompts asking if you want to overwrite files. Again, say Yes. Let it run its course, and that's it. You're done and your content is correctly installed.

Remember, never let Windows unzip and install the content for you. Never! Always use manual install, unless you are installing content through DIM that you've bought through DAZ, and your DIM is correctly set up. If it's not, consult the boards over at DAZ on how to do that. I know Meipe has recently started creating files to install though DIM, and I think that's a good thing, but the vast majority of what you buy here or at 'rosity will require manual install if you want it placed where it should be.

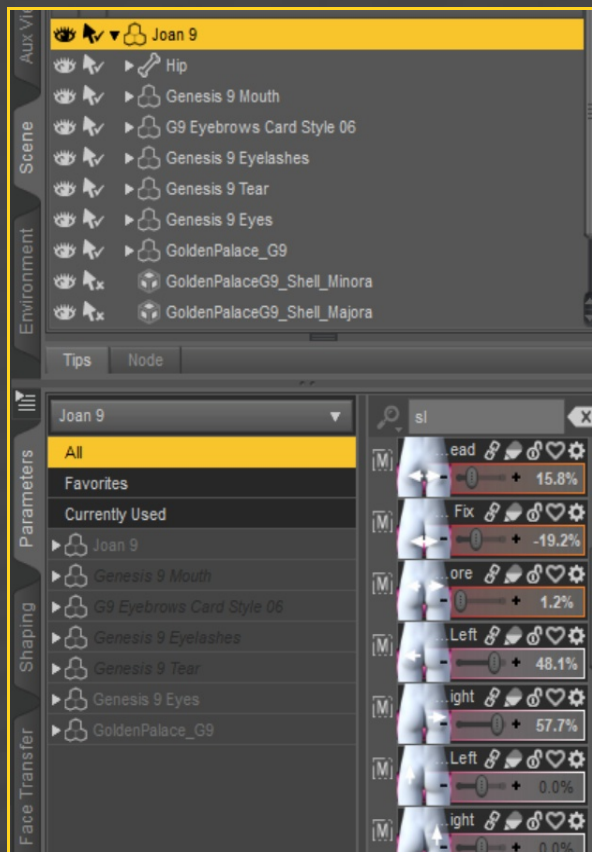

3 - Where is my content?

You can access to the presets in your 'Content Library' tab under:

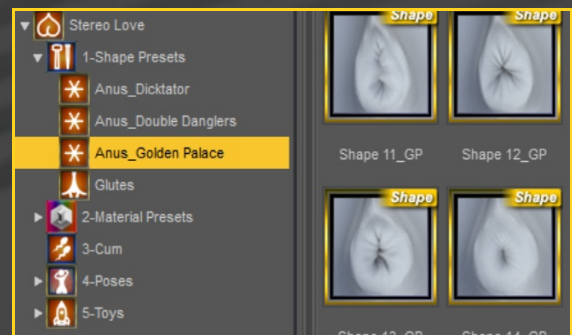

People/Genesis 9/Anatomy/Stereo Love

You can access to the dialable morphs in the 'Parameters' tab, with your main G9 figure selected in the scene. Typing "SL_" in the parameters tab, with "All" selected is a quick way to access to all the morphs:

Next, load an anus preset. If you loaded Golden Palace, use only the ones from the Anus_Golden Palace folder, the others won't work (same for the other grafts):

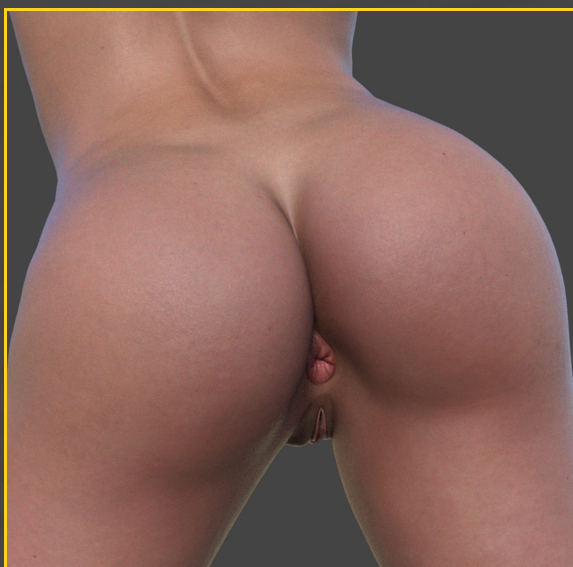

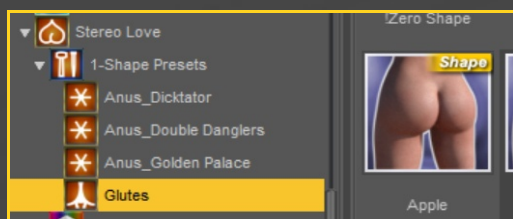

4 – Setup

For ease of use, all morphs are to be set on the main figure (not the genitalia). So, remember to have G9 selected in the scene.

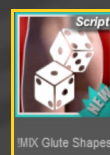

First, setup your character as usual with Golden Palace, Double Dangers or Dicktator:

The glutes can be shaped with a collection of presets:

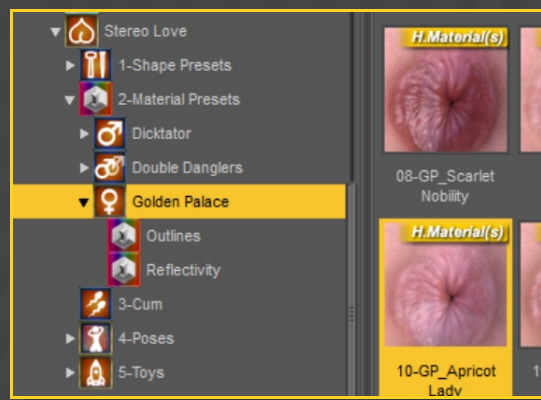

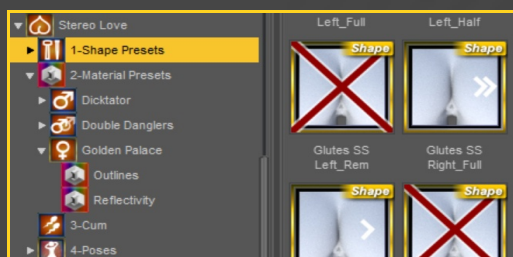

Both anus and glute shapes can be mixed with a randomizer script:

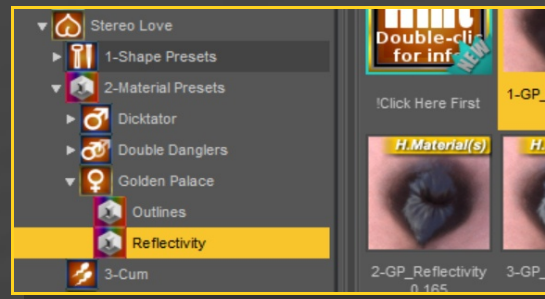

...or manually dialed in the 'Parameters' tab.

Then, you can load a color preset:

You can then spread the glutes with several sculpting morphs in the 'Parameters' tab as shown before, but also with several presets in the 'Content Library' tab:

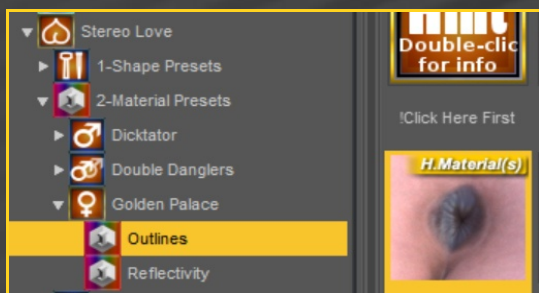

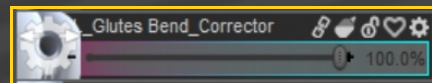

6 – JCM

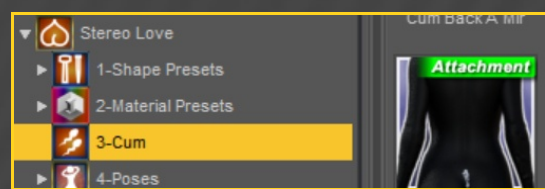

A JCM have been added to improve the anus look with thighs bended forward . You can dial the fix in the 'Parameters' tab (it's set to 100% by default):

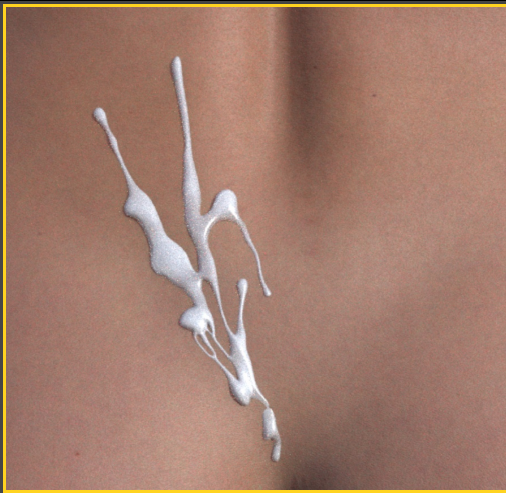

Last, you should set its outline and reflectivity:

6 – Cumshots

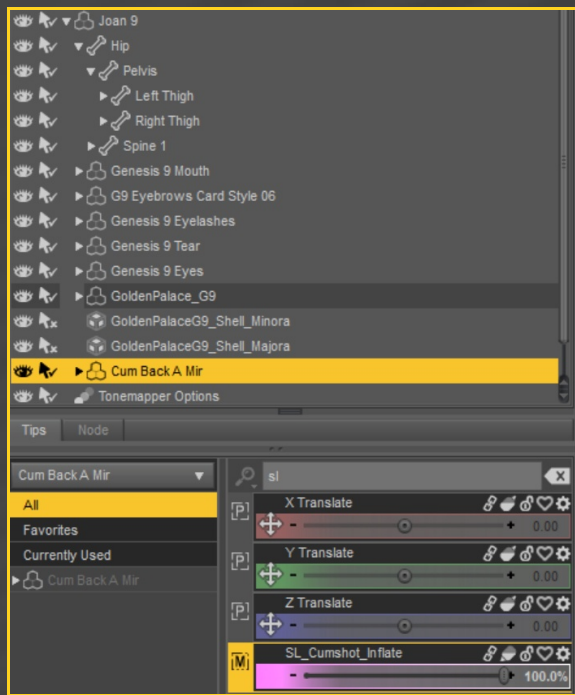

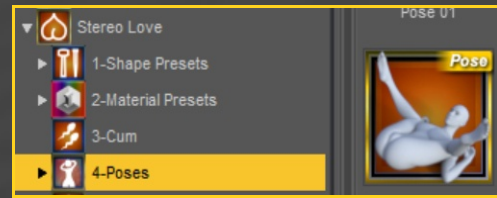

Many cumshots are included. They have to be loaded on the main G9 figure:

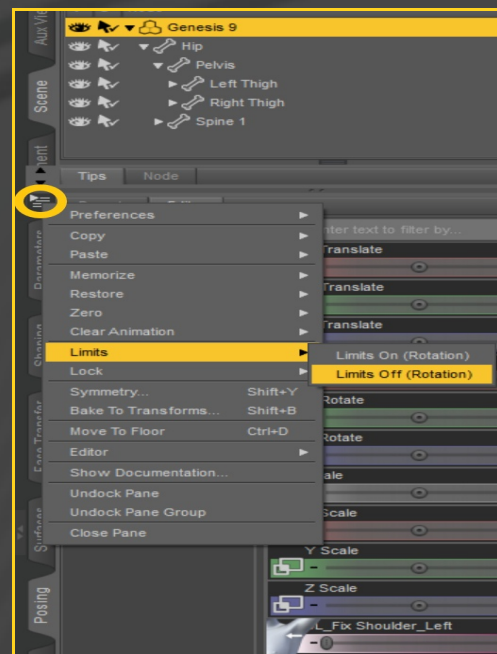

7 – Poses

Several anus-showing poses are included:

They include extreme leg bends, so you need to dial glutes spreading morphs in order to adjust their look.

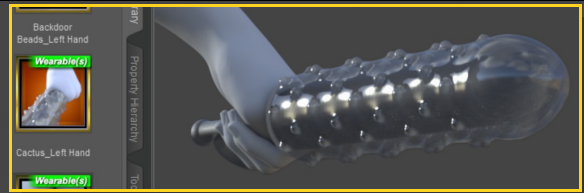

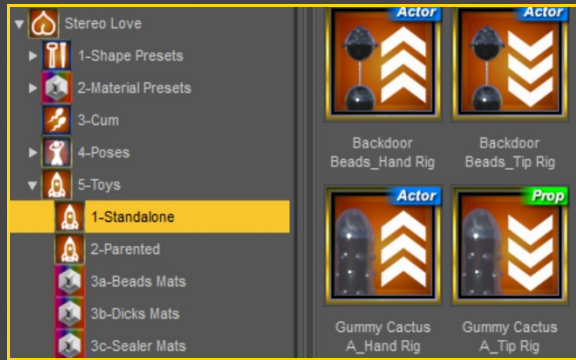

Remember to turn off the pose limits before applying:

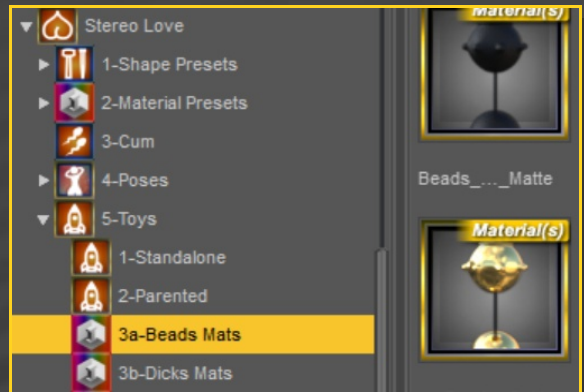

Poses are crafted for the **default** G9 shape. If you load any full body morph, the hands will need to be slightly re-posed.

8 – Toys

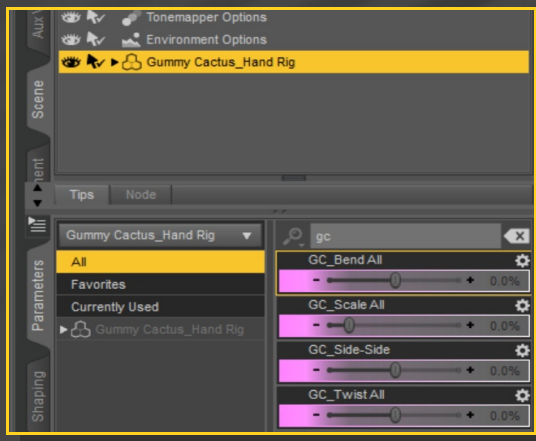

Several devices are included: three rigged ones (Backdoor Beads, Gummy Cactus, Swirly Toy) and a prop (Sealer). The rigged toys are provide with two alternate riggings: one from the top to the bottom, and vice-versa. This way, you can pose either starting from the anus or from the hand:

Last, you can color the props.

The devices include several morphs that you can dial in the Parameters tab:

They can be loaded as standalone, or parented to the anus or to the hands, that will be posed on the fly:
