

# MILKAISER for G8F Quadrumvirate

~~Tutorial~~

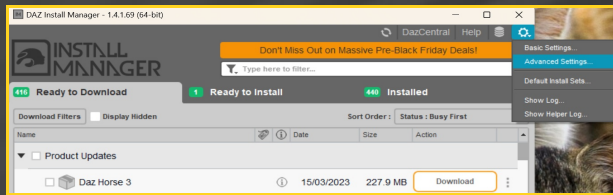

## 1 - What is Milkaiser for Quadrumvirate?

Milkaiser is an addon set for G8F *Quadrumvirate* (not included). It comes with jewels, piercings, milk squirts, milk drips, large areolas textures and extra breast shapes.

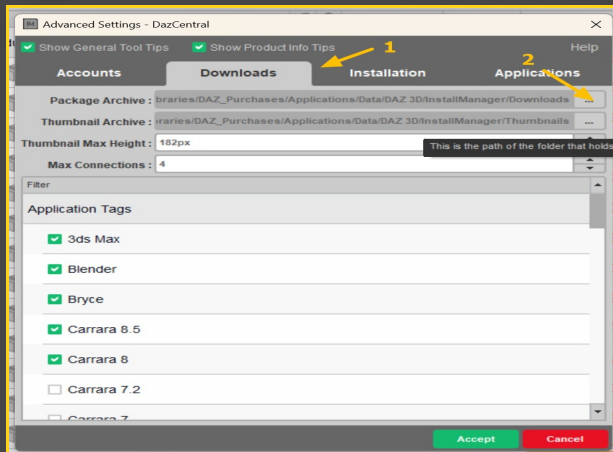

## 2 - How to install it? [two possibilities]

### A - Using DAZ Installation Manager

Picture 1: Open DIM, select "Advanced settings";

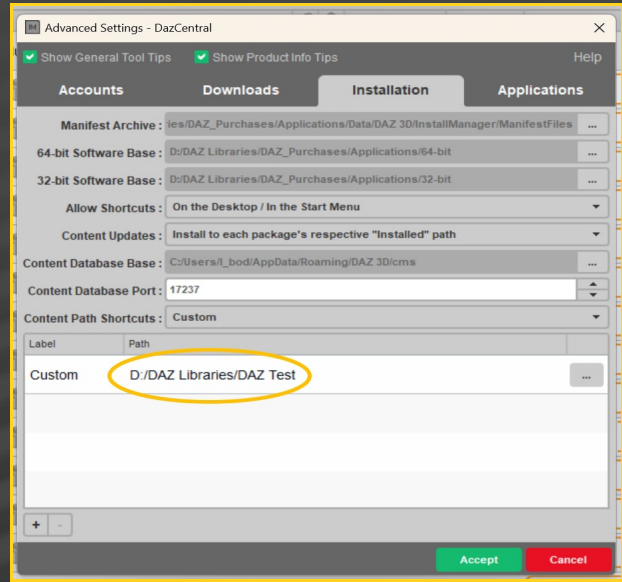

Picture 2: Check the Downloads tab (1), locate the download directory (2);

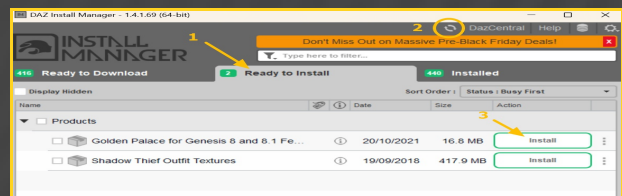

Picture 3: Browse to this very directory, drag and drop the .zip and .dsx files you downloaded from Renderotica (if you use a MAC don't click Return or Replace);

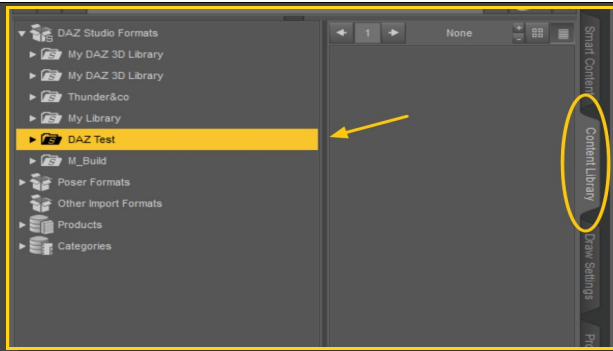

Picture 4: "Advanced settings" again, "Installation" tab, check or select your installation folder;

Picture 5: Go to the "Ready to Download" tab(1), update the list with the couple of arrows (2), click "Install" (3);

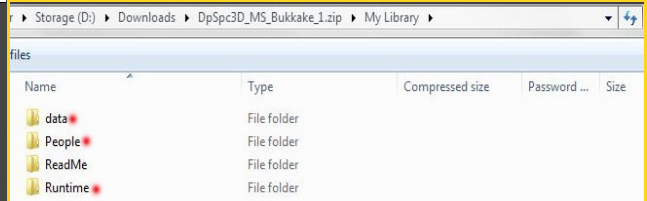

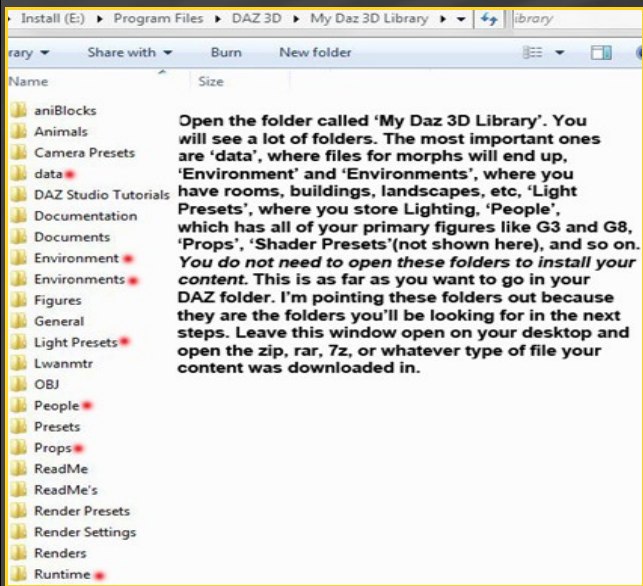

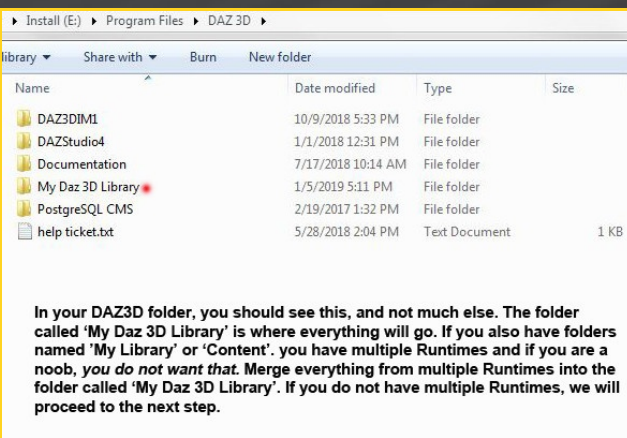

Picture 6: Open DS, locate the installation library in the "Content Library" tab.

## B – Manual procedure

For PC users: (instructions courtesy of matt):

This is the honeypot. This is your content. In some cases, when you open the zip file this is what you see right away. Sometimes not. In any case, these are the folders you will be manually installing to your 'My Daz 3D Library' folder that we looked at earlier. You left that window open on your desktop, right? No? Dingus. Reopen it. Now, select all of the folders and drag them either all at once or one at a time to their new home, which is called 'My Daz 3D Library'. You will have prompts asking if you want to merge folders. Say Yes. If it is an update, you may have prompts asking if you want to overwrite files. Again, say Yes. Let it run its course, and that's it. You're done and your content is correctly installed.

Remember, never let Windows unzip and install the content for you. Never! Always use manual install, unless you are installing content through DIM that you've bought through DAZ, and your DIM is correctly set up. If it's not, consult the boards over at DAZ on how to do that. I know Meipe has recently started creating files to install through DIM, and I think that's a good thing, but the vast majority of what you buy here or at 'rosity will require manual install if you want it placed where it should be.

For MAC users: (instructions courtesy of Guttersnipe):

1. Locate your "My Library" folder and COPY the unarchived contents of your product by dragging and dropping while holding down the "alt" button.

2. A dialogue will appear.

DO NOT PRESS RETURN OR CLICK ON "REPLACE"

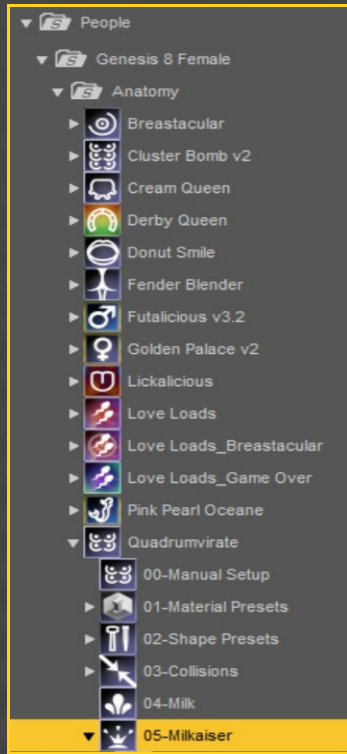

This is very, very important – if you do it will delete everything you have in any matching folders.

Instead click on "Apply to All" and then (carefully) click on "MERGE":

You may need to refresh your content library (alt-click on "My Library" and select "refresh" from the context menu) or restart Daz to see you new items.

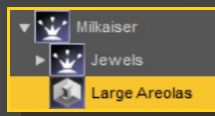

### 3 - Where is my content?

You can access to most of the addons in your Content Library tab under **People/Genesis 8 Female/Anatomy/Quadrumvirate/05-Milkaiser:**

### 4 – Large areolas

With Milkaiser, you can load giant areolas on your character. All presets can be found in the **5-Milkaiser/Large Areolas** folder:

Just select G8F and inject a color preset. You can then change its outline, and its transparency for blending with the skin.

If you loaded a nipple preset and its areola

pebbly shape doesn't look good with the texture, load the '**Areola Flatten**' preset on the graft:

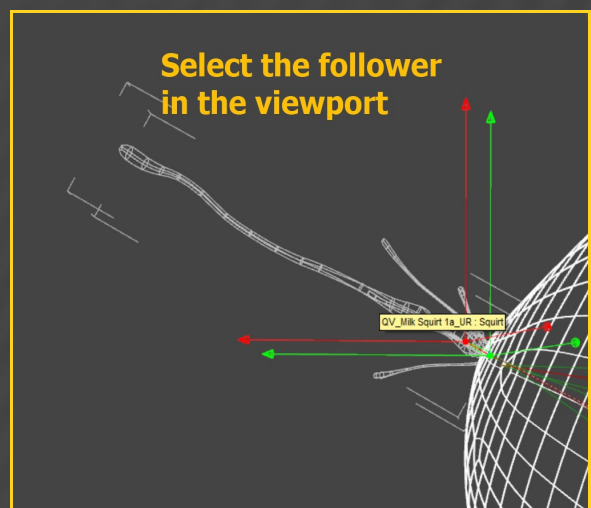

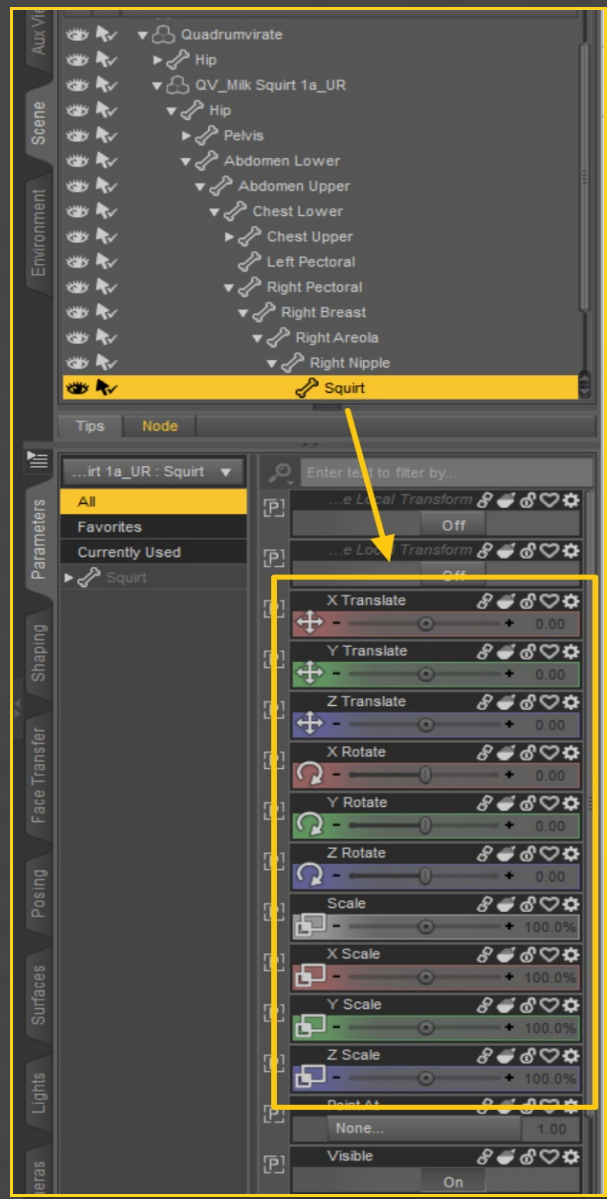

### 5 – Jewels, piercings and squirts

You can load the piercings, jewels and squirts from the **5-Milkaiser** subfolders:

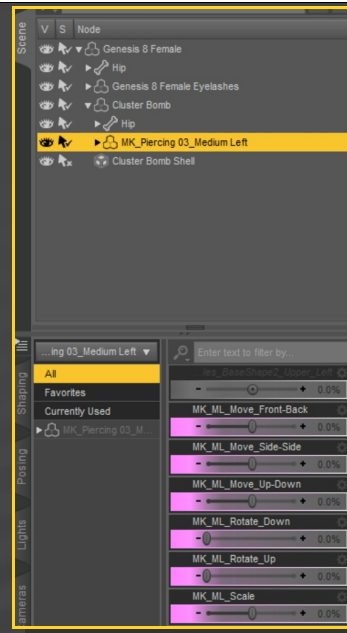

All jewels, nipples and squirts come with an extra bone that can be selected in the viewport and posed:

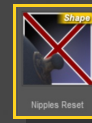

Jewels, nipples and squirts come with several morphs in the Parameters tab... They can help you shaping the follower or adjusting its position. You have to select the follower root bone in the Scene tab to see them:

Some of the jewels dial the Quadrumvirate morphs in order to squeeze the nipple in place. A tool is provided to reset the nipple if you remove the jewel:

Several rigidity maps have been included to make the jewels follow the breast shapes, but you may have to adjust the jewel posing parameters and to bend the nipples for a perfect fit.

## 6 – New breast shapes

Some breast shapes have been added to the collection: implant 9, 10. You can dial them on G8F (filter the parameters typing QV\_ to quickly find them) or inject them with the presets included in the Quadrumvirate/*Shapes Presets/Breast Shapes* folder:

Quadrumvirate

- 00-Manual Setup
- 01-Material Presets
- 02-Shape Presets
  - Breasts Gravity
  - Breasts Shapes**
  - Nipples
  - 03-Collisions
  - 04-Milk
  - 05-Milkaiser
    - Jewels
    - Large Areolas
    - Milk Drips
    - Milk Flows
    - Milk Squirts

Implant 08
